Grade Level: Kindergarten - 3

Customer Reviews

I bought this to talk to my 8 year-old son about drugs (early, but I'd rather start now).I liked it so much that now I am lending it to other family members so they can use it to talk to their kids about drugs.This book is a great resource for the following reasons:- great conversation starter with your kid to prepare them just in case they get approached- The book works for all ages. It works for the younger kids because the language is simple, it has large pictures, the content is short and that helps keep their attention and helps them understand. It works for the older kids because there is a page at the end on how to respond if they get approached by someone to try drugs- each page has one or two simple, short sentences.- The book covers different types of drugs (prescription, over the counter etc). This gives the opportunity to stop at each page and have your own discussions with your child on that topic- the book covers addiction, including alcohol, nicotine and drugs, and what each of these do to your bodyI highly recommend this book to parents with kids of all ages, if they are looking for a book to educate their kids about drugs, and give them tools to avoid drugs.
