The Mobile Mind Shift: Engineer Your Business To Win In The Mobile Moment

Synopsis

Mobile has reprogrammed your customers' brains. Your customers now turn to their smartphones for everything. What's tomorrow's weather? Is the flight on time? Where's the nearest store, and is this product cheaper there? Whatever the question, the answer is on the phone. This Pavlovian response is the mobile mind shift -- the expectation that I can get what I want, anytime, in my immediate context. Your new battleground for customers is this mobile moment -- the instant in which your customer is seeking an answer. If you're there for them, they'll love you; if you're not, you'll lose their business. Both entrepreneurial companies like Dropbox and huge corporations like Nestl  are winning in that mobile moment. Are you? Based on 200 interviews with entrepreneurs and major companies across the globe, *The Mobile Mind Shift* is the first book to explain how you can exploit mobile moments. You'll learn how to: - Find your customer's most powerful mobile moments with a mobile moment audit. - Master the IDEA Cycle, the business discipline for exploiting mobile. Align your business and technology teams in four steps: Identify, Design, Engineer, Analyze. - Manufacture mobile moments as Krispy Kreme does -- it sends a push notification when hot doughnuts are ready near you. Result: 500,000 app downloads, followed by a double-digit increase in same-store sales. - Turn one-time product sales into ongoing services and engagement, as the Nest thermostat does. And master new business models, as Philips and Uber do. Find ways to charge more and create indelible customer loyalty. - Transform your technology into systems of engagement. Engineer your business and technology systems to meet the ever-expanding demands of mobile. It's how Dish Network not only increased the efficiency of its installers but also created new on-the-spot upsell opportunities. Mobile is rapidly shifting your customers into a new way of thinking. You'll need your own mobile mind shift to respond.

Book Information

Hardcover: 272 pages

Publisher: Groundswell Press (June 24, 2014)

Language: English

ISBN-10: 0991361008

ISBN-13: 978-0991361007

Product Dimensions: 6 x 1.4 x 9.4 inches

Customer Reviews

According to co-authors Ted Schadler, Josh Bernoff, and Julie Ask, "The mobile mind shift is the expectation that I can get what I want in my immediate context [i.e. time of day and location] and moments of need." Moreover, "A mobile moment is a point in time and space when someone pulls out a mobile device to get what he or she wants immediately, in context." A rapidly increasing number of buyers have that expectation and thus it is imperative for sellers to formulate and then implement a strategy that will accommodate that expectation. "Serving customers with mobile is easy to imagine, but very difficult to achieve. Why? Because your company and its processes and information systems were never designed with mobile moments in mind. Your technology is too rigid, your processes too linear, and your organization too siloed. The expectation of customers in their mobile moments massively disrupts these well-intentioned but calcified ways of doing business." What to do? How to re-engineer one's business to win in the mobile moment? Schadler, Bernoff, and Ask wrote this book in response to this question. They provide a wealth of information, insights, and counsel that are based on real-world experience (for better or worse) from which valuable business lessons have been learned.
